

TRANSPORT MANAGEMENT SYSTEM

e-TMS[©] includes the whole process of transport of goods in which all departments of the company are involved, from the order entry up to the transfer to accounting, including the planning-dispatching, execution-tracking, invoicing and reporting KPI phases. The statistic cube module helps in decision making.

control carbon footprint per trip and per order

FOR EACH COMPANY, THE BEST SOLUTION

WEB & CLOUD

Our technology is **100% web**, with over 10 years' **experience** in transactional environments, which has given us a **stable** platform and makes of us pioneers in the logistics and transport industry. Our platform can be installed at the client's home, or can be used in "**Cloud Computing**".

INTERNATIONAL

Our company is international and our internationalisation is closely linked to the **internationalisation** of our customers. Our solution is **multi-language** and allows working online in multiple languages on the **same application** for users, customers, suppliers and any other person in the logistics environment.

SCS: STANDARD COLLABORATIVE SOFTWARE

We offer our **customers** the possibility of working with us in the evolution of the product. This is possible by working in a close relationship with the IT departments. It also allows users to work and **customise** the software within their own **company**. Therefore if our clients wish to, they can develop, personalise and make the application grow without having to rely on us.
